# Subject Index, Volume 20

All mineral names occuring in titles, subtitles and abstracts are indexed Chemical formulae are according to M. Fleischer, Glossary of Mineral Species, 1983 (in some cases simplified) or as given by the author. The numbers refer to the title page.

**A**

Alabandite MnS, compressibility and high pressure phase transition 63
Annite $KFe_3^{2+}AlSi_3O_{10}(OH)_2$, nuclear gamma ray resonance of, synthesized at different oxygen fugacities 382
Aragonite $CaCO_3$, Raman spectra at high pressures and temperatures 1

**B**

Band structure, in pyrite-type disulfides 248
Berlinite $AlPO_4$, phase transition at high pressures 176
Biotite $K(Mg, Fe^{2+})_3(Al, Fe^{3+})Si_3O_{10}(OH, F)_2$, oxidation kinetics studied by nuclear gamma ray resonance 276
Brochantite $Cu_4(SO_4)(OH)_6$, hydrogen bonding in 27

**C**

Calcite $CaCO_3$, $CO_3^{3-}$-ion in, by EPR 136
– –, diamagnetic anisotropy of 77, 82
– –, quantum mechanical Hartree-Fock study of 104
– –, Raman spectra of, at high pressures and temperatures 1
– –, solid solution model in the system $CaCO_3-MgCO_3-FeCO_3$ 33, 42
Calorimetry, of (Mg, Fe)-olivines 536
Cation distribution, cf. order-disorder
Chalcopyrite $CuFeS_2$, K- and L-edge X-ray absorption spectra 489
Chemical bonding, bond lengths and radii in oxides and fluorides from MO-calculations 617
– –, and dynamical phenomena in MgO 587
– –, the ionic model, extended to spatial charge distribution 601
– –, in pyrite type disulfides 248
– –, valency of 3d transition metals from L-edge X-ray absorption spectra 111
Compressibility, of alabandite 63
– –, of quartz, modelling of, by using molecular potentials 123
Cordierite $Mg_2Al_4Si_5O_{18}$, flux grown, structural chemistry of 563
Corundum $Al_2O_3$, diamagnetic anisotropy of 77, 82
Cristobalite, polymorphs of $AlPO_4$ and $SiO_2$, $^{31}P$, $^{27}Al$, $^{29}Si$ NMR of 341
Crystal growth, cordierite, by flux methods 563

**D**

Defects, OH in olivines, computer modelling of 515
–, OH in garnets 500
–, OH in pyrope, and Ti-substitutions 483
–, OH in quartz, orientation of 308
Diffusion, of $^4He$ in hematite 415
–, thermal, in silical glass at high pressures 201
Diopside $CaMgSi_2O_6$, microstructural defects in shock-treated 521
Dolomite $CaMg(CO_3)_2$, Raman spectra at high pressures and temperatures 1

**E**

Elastic properties, Ca-, Sr-Ba-titanate perovskites up to 30 kbar 97
– –, neighbourite 419
Electronic absorption spectra, $Co^{2+}$ in trigonal fields of oxygen-based structures 460
– – –, of porovskite-type $(Mg, Fe)SiO_3$ 478
Electron paramagnetic resonance (EPR), $CO_3^{3-}$-ion in calcite 136
– – –, of $Fe^{3+}$-centres in kaolinite 242

**F**

Feldspar group, (Ca, Sr)-feldspar solid solution 221
Forsterite $Mg_2SiO_4$, Hartee-Fock study of 333

**G**

Gahnite $ZnAl_2O_4$, cation distribution in, temperature dependent 541
Glasses, coordination of Na in, from $^{23}Na$ NMR 297
Grossular $Ca_3Al_2(SiO_4)_3$, hydrogarnet defects in 500
Grüneisenparameter, of synthetic $(Fe, Mg)SiO_3$ orthopyroxenes 575

**H**

Hematite $Fe_2O_3$, $^4He$ diffusion in 415
High pressure, amorphitisation of α-quartz-type $GeO_2$ 531
– –, laser-heated diamond anvil cell up to 700 kbar 86
– –, melting of wüstite and iron up to 600 kbar 91
– –, multianvil, low differential stress experiments 315
– –, phase transformation in quartz and berlinite 176
– –, Raman spectra of carbonates at 1
– –, structural modifications of olivine-type $Mg_2GeO_4$ at 556
High pressure, thermal diffusivity in silica glass 201
– –, X-ray diffraction of ilvaite 402
Hydrogen bonding, in malachite and brochantite 27
Hydroxyl groups, calculated trends of stretching vibrations in alumosilicate molecules 425
– –, defects in olivine, energetical and structural modelling 515
– –, of hydrogarnet defects in grossular 500
– –, and Ti substitutions in pyrope 483
– –, and hydrogen bonding in malachite and brochantite 27

**I**

Ilvaite $CaFe_2^{2+}Fe^{3+}Si_2O_7O(OH)$, high pressure X-ray diffraction 402
Imogolite $Al_2SiO_3(OH)_4$, layer curvature in 190
Impedance spectroscopy, olivine 19
Infrared absorption (IR) spectra, of malachite and brochantite 27
– – –, and orientation of dipoles of OH-defects in quartz 308
Ion exchange, between nepheline-kalsilite solid solutions and molten alkali nitrates 433
Iron, melting up to 600 kbar 91

**K**

Kalsilite $KAlSiO_4$, cation exchange with alkali nitrate melts 433
Kaolinite $Al_2Si_2O_5(OH)_4$, $Fe^{3+}$-centres in, by EPR 242
– –, layer curvature in 190
Kinetics, oxidation of biotite 276

**L**

Lattice dynamics, and vibrational spectra of protoenstatite 469
Layer curvature, in sheet silicates 190
Luminescence spectra, of $Cr^{3+}$ in spinel, vibrational structure of 120

**M**

Magnesiochromite $MgCr_2O_4$, cation distribution in 541
Magnesite $MgCO_3$, quantum mechanical Hartree-Fock study of 104
– –, Raman spectra at high pressures and temperatures 1
– –, solution model in the system $CaCO_3-MgCO_3-FeCO_3$ 33, 42
Magnetic properties, diamagnetic anisotropy of oxygene-based minerals 77, 82
– –, diamagnetic anisotropy of sheet silicates 369
Magnetite $Fe^{2+}Fe_2^{3+}O_4$, cation distribution in 541
Malachite $Cu_2(CO_3)(OH)_2$, hydrogen bonding in 27
Mass spectroscopy, Knudsen cell, of roederrites and their thermodynamic properties 362
$MgSiO_3$, perovskite type, properties of 159
$Mg_2GeO_4$, olivine type, pressure induced modifications 556
Melts, coordination of Na in silicate-, by $^{23}Na$ NMR 297
–, diffusion in $MgSiO_3-Mg_2SiO_4$ melts, molecular dynamics simulation of 255
–, non-Newtonian rheology of silicate- 454

Modelling, energetic and structural of hydrogarnet defects in hydrogrossular 500
–, OH-defects in olivine 515
–, molecular dynamics of diffusion in $MgSiO_3$–$Mg_2SiO_4$ melts 255
Mössbauer spectroscopy, cf. nuclear gamma ray resonance (NGR)
Mullite $Al_6Si_2O_{13}$, ordering of oxygene vacancies in, and incommensurate structure of 323

N

Neighbourite $NaMgF_3$, elastic properties of 419
Nepheline (Na, K)$AlSiO_4$, cation exchange with alkali nitrate melts 433
Nickel, melting curve of, up to 700 kbar 86
Nuclear gamma ray resonance (NGR), of annites, synthesized at different oxygen fugacities 382
– – –, and crystal chemistry of pumpellyites 443
– – –, and kinetics of biotite oxidation 276
– – –, in orthopyroxenes, temperature dependence 263
Nuclear magnetic resonance (NMR), $^{23}Na$ and coordination of Na in silicate crystals, melts and glasses 297
– – –, $^{17}O$ and $^{25}Mg$ in MgO, temperature dependent 587
– – –, $^{31}P$, $^{27}Al$ and $^{29}Si$ in $AlPO_4$- and $SiO_2$-$\beta$-cristobalite polymorphs 341

O

Olivine group, hydrogarnet defects in, computer modelling of 515
– –, mixing behaviour of (Mg, Fe)-olivines 536
– –, impedance spectroscopy of single- and poly-crystalline olivine 19
Optical absorption spectra, of $Co^{2+}$ in trigonal fields oxygen based structures 460
– – –, of perovskite-type (Mg, Fe)$SiO_3$ 478
– – –, of tourmalines with various transition metal ions 209
Order-disorder, and energetics of spinel end members 626
–, disordered compositional domains in flux grown cordierites 563
–, in spinels, interionic potential calculations 228
Orthopyroxenes, thermal expansion, Debye temperature and Grüneisenparameter of 575

P

Perovskite $CaTiO_3$, electron microscopic study of the domain structure in 147
– –, phase transitions studied by vibrational spectroscopy and modelling 159
– –, high temperature X-ray diffraction of 171
– –, heat capacity and phase transition of 141
Provskite-type, Ca-, Sr-, Ba-titanate, elasticity of 97
–, $MgSiO_3$, quantum mechanical study of 407
–, (Mg, Fe)$SiO_3$, optical absorption spectra of 478
Periclase MgO, chemical bonding in, from temperature dependent $^{17}O$- and $^{25}Mg$-NMR 587
Phase transition, of alabandite at high pressures 63
– –, of (Ca, Sr)-feldspar solid-solution 221
– –, of perovskite 141
– –, – –, and electron microscopy 147
– –, of quartz and berlinite at high pressures 176
Photoelectron spectroscopy, of Tl-Sb sulfosalts 285
Protoenstatite $Mg_2Si_2O_6$, dynamics and Raman spectra of 625
– –, lattice dynamics and vibrational spectra of 469
Pseudowollastonite $CaSiO_3$, transmission electron microscopy of 56
Pumpellyite-group $Ca_2XY_2(SiO_4)(Si_2O_7)(OH)_2 \cdot 2H_2O$, crystal chemistry of, by NGR and Rietveld refinements 443
Pyrite-type disulfides, electronic structure of, from band structure calculations 248
Pyrope $Mg_3Al_2(SiO_4)_3$, Ti-substitution and OH-defects 483
Pyroxene-group, temperature dependence of NGR in orthopyroxenes 263

Q

Quantum mechanics, electron densities and interaction energies from, as compared to data from an spatial-extended ionic model 601
– –, Hartree-Fock study of $CaCO_3$ and $MgCO_3$ 104
– –, – – $Mg_2SiO_4$ polymorphs 333
– –, MO-calculatios of bond lengths and radii in oxides and fluorides 617
– –, of perovskite-type $MgSiO_3$ 407
Quartz $SiO_2$, diamagnetic anisotropy of 77, 82
– –, modelling of structure compressibility using molecular potential 123
– –, OH-defects in, orientation of 308
– –, phase transformation at high pressures 176
– –, thermoluminescence spectra of igneous and hydrothermal vein- 353

R

Raman spectra, of carbonates, at high pressures and temperatures 1
– –, and lattice dynamics of protoenstatite 625
– –, and pressure induced structural modifications of olivine-type $Mg_2GeO_4$ 556
Rheology, of silicate melts, non-Newtonian 454
Ringwoodite $\gamma$–$Mg_2SiO_4$, Hartree-Fock study of 333
Roedderite (Na, K)$_2Mg_5Si_{12}O_{30}$, equation of state for 362

S

Stannite $Cu_2FeSnS_4$, K- and L-edge X-ray absorption spectra 489
Sanmartinite (Zn, $Fe^{2+}$)$WO_4$, solid solution with cuproscheelite, site occupancy of $Cu^{2+}$ in 375
Shock effects, and microstructural defects in diopside 521
Siderite $FeCO_3$, solution model in the system $CaCO_3$–$MgCO_3$–$FeCO_3$ 33, 42
Solid solution thermodynamics, Al, Ga mixing properties in the system Na(Al, Ga)$SiO_4$ 594
– – –, and phase transition of (Ca, Sr)-feldspars 221
– – –, solid solution model for $CaCO_3$–$MgCO_3$–$FeCO_3$ 33, 42
– – –, symmetric regular solution model for (Mg, Fe)-olivines 536
Sphalerite ZnS, K- and L-edge X-ray absorption spectra 489
Spinel $MgAl_2O_4$, luminescence spectra of $Cr^{3+}$ in, vibrational structure of 120
Spinel group, cation distribution in $MgCr_2O_4$, $ZnCr_2O_4$, $Fe_3O_4$, $ZnAl_2O_4$ 541
– –, energy and long-range order in end members 626
– –, order-disorder in, and interionic potential calculations 228
Sulfosalts, Tl-Sb, photoelectron-spectroscopy of 285

T

Talc $Mg_3Si_4O_{10}(OH)_2$, diamangnetic anisotropy of 77, 82
Tetrahedrite (Cu, Fe)$_{12}Sb_4S_{12}$, oxidation state of Cu in, from X-ray L-edge absorption spectroscopy 395
Thermal expansion, of synthetic (Fe, Mg)$SiO_3$ orthopyroxenes 575
Thermodynamic properties, of $CaTiO_3$ and $MgSiO_3$ perovskites 159
– –, of (Ca, Sr)-feldspar solid solutions 221
– –, equation of state for roedderites 362
– –, heat capacity and phase transition of $CaTiO_3$ perovskite 141
– –, – of (Mg, Fe)-olivine solid solutions 536
Thermoluminescence spectra, of quartz, igneous and hydrothermal vein- 353
Transmission electron microscopy (TEM), domain structure in perovskite due to phase transition 147
– – –, and high pressure phase transitions in quartz and berlinite 176
– – –, of micro-structural defects in shock treated diopside 521
– – –, of pseudowollastonite 56
Tourmaline group, electronic absorption spectra of various transition metal ions in 209

V

Valency, of 3d transition metals from L-edge X-ray spectroscopy 111
Vibrational spectra, of $CaTiO_3$ perovskite, and their modelling 159
– –, carbonates at high pressures and temperatures 1
– –, –, and dynamics of protoenstatite 625
– –, –, of malachite and brochantite, hydrogen bonding in 27
– –, –, of OH in aluminosilicate molecules 425
– –, –, of OH in quartz, and orientation of OH dipoles 308
– –, –, and lattice dynamics of protoenstatite 469

**W**

Wadsleyite $\beta-Mg_2SiO_4$, Hartree-Fock study of 333
Wüstite FeO, melting up to 600 kbar 91

**X**

X-ray diffraction, powder studies on cation distribution in spinel end members 541
– –, study of the amorphitization of $GeO_2$ at high pressure 531
X-ray spectra, of Cu 2p and Cu site occupancy in sanmartinite-cuproscheelite solid solutions 375
– –, L-edge absorption and oxidation state of Cu in tetrahedrite 395
– –, L-edge absorption and valency of 3d transition metals 111
– –, (XANES, EXAFS), sulfur K- and L-edge of sulfides 489
– –, (EXAFS), temperature dependent, of metamict zircon 504

**Z**

Zircon $ZrSiO_4$, metamict, temperature dependent EXAFS spectroscopy 504
